

Balancing Valve

cim747NL

Fixed Orifice with Integral Test Points in CRM - FIPT x FIPT

Applications:

The CIM 747 balancing valve is manufactured in accordance with EN ISO 9001 and is designed to provide high accuracy flow balancing and measurement across all valve settings. The CIM 747 balancing valve is available in valve sizes from 1/2" through 2" and is manufactured of corrosion resistant brass. It is suitable for both heating (LPHW) and cooling applications at working pressures up to 232 PSI.

Features:

- A compact body design integrating a fixed orifice and test points permitting high accuracy flow measurement to within +/- 5% regardless of valve setting.
- A metal to metal thread locking mechanism designed to accurately lock valve settings enabling the valve to be closed and re-opened to its exact pre-set position.
- A flip-up cap housing individual Allen key for valve position locking.
- Heat and impact resistant nylon non-rising handle with a 360° re-settable index collar and indicator scale which can be read from any angle.
- An EPDM lined valve plug provides increased control and tight shut-off for isolation purposes.

The CIM 747 balancing valve has been tested by BSRIA with water containing high air and dirt levels. Testing results demonstrated an excellent tolerance to such conditions providing confidence that the valves will retain a high level of accuracy and repeatability of flow measurement under even the worst system conditions.

Threading:

NPT threads ANSI B1.20.1.

Size	Fast Order No.
1/2"	747NL-04
3/4"	747NL-06
1"	747NL-07
1-1/4"	747NL-08
1-1/2"	747NL-09
2"	747NL-10

All Cimberio valves qualify for the American Recovery and Reinvestment Act and the Buy American Act.

Based on NSF/ANSI 61-2008 Annex G in compliance with section 116875 of The California Health & Safety Code.
